PROFESSIONAL SUMMARY

IT professional with nearly two years of hands-on experience across internal IT support and systems administration, business process automation, and data engineering and analytics, with a practical foundation in front-end development and AI-assisted workflows. Currently an IT Operations Support Specialist (Data and Systems Support Specialist) at Honda Motor Sports, Inc., where I support enterprise systems (L1-L3) and POS environments (L1-L2), administer Microsoft 365, CRM, and facility platforms, and build automation - including AI agent workflows and ETL/ELT and Change Data Capture pipelines - that reduces manual effort across documentation, development, support, email handling, calendar scheduling, and task management. Skilled in Python, SQL, PySpark, Selenium, Power BI, and web technologies (HTML, CSS, JavaScript, Bootstrap), with certifications in Azure Fundamentals (AZ-900), Microsoft Fabric Data Engineering (DP-700 preparation), and SQL. Bachelor of Science in Information Technology with coursework in information assurance, data warehousing, and systems integration.

TECHNICAL SKILLS

IT Support & Systems Administration: Windows, Linux, and macOS administration; enterprise systems support (L1-L3); POS technical support (L1-L2); hardware, printer, and mobile device setup; networking fundamentals and system troubleshooting; user access administration; IT asset and software licensing tracking; documentation and user training

Business Systems & Cloud Administration: Microsoft 365 Administration; HubSpot CRM Administration; MaintainX; Growatt; Bluehost; Google Calendar and email administration; Jira task management; Microsoft Azure (AZ-900)

Automation & AI-Assisted Development: AI agent workflows for documentation, development, support, email handling, calendar scheduling, and task management; Selenium browser automation and web scraping; Python process automation; ETL/ELT and CDC pipeline automation; Agile SDLC

Front-End & Web Development: HTML, CSS, JavaScript, Bootstrap, PHP; responsive web interfaces; UI/UX and human-computer interaction principles; Python GUI development (Tkinter, Flask, Django)

Data Engineering: ETL/ELT development; Change Data Capture (CDC) pipelines; Medallion architecture (Bronze-Silver-Gold); Microsoft Fabric Lakehouse; Databricks; PySpark; data modeling; data warehousing concepts; Snowflake SQL

Data Analysis & BI: Power BI; Microsoft Excel (Power Query, pivot tables, SUMIF/AVERAGEIF, dashboards, trend analysis); Python analytics (Pandas, NumPy, Matplotlib, Scikit-learn); regression and clustering; data cleaning, validation, and QA

Languages & Practices: Python, SQL, PySpark, C, C++, Java, PHP, JavaScript; Agile SDLC; QA testing; documentation management

WORK EXPERIENCE

IT Operations Support Specialist (Data and Systems Support Specialist)
Honda Motor Sports, Inc. - Makati City | March 2025 - Present

- Provide enterprise systems support (L1-L3) and POS technical support (L1-L2), diagnosing and resolving hardware, software, network, and application issues for internal users to keep operational systems stable.
- Administer Microsoft 365, user accounts, access permissions, and system configurations, and manage HubSpot CRM, MaintainX, Growatt, and Bluehost platforms.
- Support Linux, Windows, and macOS environments, including installation, configuration, and maintenance of computers, mobile devices, printers, and peripheral equipment.
- Develop and maintain ETL/ELT and Change Data Capture (CDC) pipelines that integrate internal systems and improve data flow for reporting.
- Design and operate AI agent workflows that handle technical documentation, development assistance, automation, end-user support, email handling, calendar scheduling, and Jira task management.
- Serve as junior systems analyst and software developer (Agile SDLC) for internal applications, and as QA tester and Data QA associate validating HubSpot CRM datasets for reporting.
- Maintain IT documentation, knowledge base articles, and operational procedures, and support IT asset and software licensing records.

Lecturer (Part-Time)
Romblon State University - Cajidiocan Campus | July 2024 - December 2024

- Delivered instruction in Fundamentals of Business Analytics (Excel): data cleaning, pivot tables, Power Query, SUMIF/AVERAGEIF, dashboards, and trend analysis.
- Taught Human-Computer Interaction (Python): GUI development (Tkinter, Flask, PyQt5, Kivy), UI/UX principles, Agile methodology, and database management (SQLite3, MySQL).
- Designed learning materials on analytics workflows and structured data handling, and managed academic records and datasets with accuracy.

PROJECTS

Selenium Web Scraping & Browser Automation
Independent Project

- Built an automation solution that uses Selenium to scrape and collect data from web sources, removing manual, repetitive data-gathering work.
- Structured extracted data into analysis-ready datasets, applying browser automation, element interaction, and repeatable script-driven runs for consistent collection.

Credit Monitoring and Evaluation System
Internal Business System - Credit Department

- Developed a monitoring and evaluation system used by the credit department to track, monitor, and evaluate credit records and their statuses in one centralized platform.
- Consolidated credit monitoring data into organized, searchable records, improving visibility and traceability of credit evaluations, and supporting routine evaluation workflows and department reporting.

AI Agent Workflow for IT Operations Support
Applied AI - Daily Operations

- Built and use AI agent workflows daily as an IT Operations Support specialist, covering documentation, development, automation, support, email handling, calendar scheduling, and Jira task management.
- Automated technical documentation and knowledge base drafting, support responses, and email handling through agent-driven prompts and reusable workflow steps.
- Used agents to assist development and automation tasks and to manage Jira tasks and meeting scheduling, reducing repetitive manual coordination work.

End-to-End ETL/ELT Development in Databricks
Data Engineering Project

- Designed and implemented an ETL/ELT pipeline following the Bronze-Silver-Gold medallion pattern in a Databricks-based Lakehouse environment.
- Ingested raw structured and semi-structured datasets into the Bronze layer with automated workflows, schema validation, and data lineage tracking.
- Applied cleaning, deduplication, and transformation logic with PySpark and SQL in the Silver layer, engineered curated Gold-layer tables for analytics, and exposed finalized datasets to Power BI for stakeholder dashboards.

Microsoft Fabric Lakehouse - Learning & POC Implementation
Data Engineering Project

- Designed a Microsoft Fabric-style Lakehouse architecture following Bronze-Silver-Gold principles, ingested raw datasets into a simulated Bronze layer, and prepared analytics-ready Gold tables using Python and SQL for Power BI reporting.

Python Data Analysis & Machine Learning Exercises
Analytics Project

- Implemented regression and clustering algorithms (Linear Regression, Logistic Regression, K-Means) for analytical use cases.
- Automated preprocessing pipelines with Pandas and NumPy, visualized insights with Matplotlib to support decision-making, and built GUI applications using Tkinter, Flask, and Django.

Capstone Project - Web-Based Classroom Utilization Management System
RSU-CC Education Program

- Developed a web-based system for managing classroom utilization for the RSU-CC Education Program.

CERTIFICATIONS

- AZ-900: Microsoft Azure Fundamentals | DP-700 Preparation: Microsoft Fabric Data Engineer Associate
- Associate Data Engineer in SQL | Introduction to Snowflake SQL
- Introduction to AI Agents | Database Design

EDUCATION

Bachelor of Science in Information Technology
Romblon State University - Cajidiocan Campus | August 2020 - June 2024

- Academic Distinction. Relevant coursework: Data Warehousing & Data Mining, Advanced Database Systems, Data Structures & Algorithms, Object-Oriented Programming (Java), Web Systems Technologies, Statistics & Probability, Information Assurance Security, Systems Integration & Architecture.
